

# FZ FORZA®

INNOVATED IN DENMARK 

---

COLLECTION 2020/2021

---

## FZ FORZA

In March 2019 FZ FORZA became a member of the SPORTS GROUP DENMARK family, with the brand returning into the hands of its founder, Mark Christiansen, who in 19XX was behind the creation of the FZ FORZA brand.

In October 2019 FZ FORZA then entered into a significant and very exciting partnership with VICTOR. Two major players in the international badminton market joining forces and significantly strengthening their position in the badminton industry, working together on the future sale, distribution and development of FZ FORZA & VICTOR.

The partnership creates a strong force within the badminton industry, not only in Denmark and Europe, but globally too. The cooperation will have a major strategic impact on all elements of both companies, as the agreement involves collaboration on everything from design and product development to sales, procurement, logistics, sponsorship and general marketing. The best of both brands will thus be utilized, which will be combined in the brands' existing operations and development of collections, but without them resembling one another. FZ FORZA will still maintain its success with the clean-cut Scandinavian design and its pride in being "Innovated in Denmark".

National Team Wear.....	16-17
Basic .....	18
Club Collection 2019/2021 .....	19-21
Shorts/Skirts/Pants.....	22-23

## FZ TECHNOLOGIES

### ANTISTATIC

When moving around you create static electricity, but our fabrics prevent the garments from sticking to your body. To avoid your garments from being static, please do not tumble dry.

### STRETCHABLE

Most fabric is stretchable either by knitting or due to added elastane. We make sure that the style has just the right stretch in order for the style to both fit the body and give comfort.

### ANTI-PILLING

Our garments are made in fabrics either constructed to avoid anti-pilling or fabrics that are given an anti-pilling treatment. Even after washing several times, the surface will still look good.

### DRYFORZE

DryForze keeps you comfortable during the game! With the unique DryForze treatment, we ensure maximum comfort. DryForze makes the fabric perspiration transporting, quick drying and super pleasant to wear, and the DryForze capabilities will stay with your clothes for much longer than similar technologies. Fabric treated with DryForze has high breathability and a cool wearing comfort.

### ANTI SHRINK

All garments have been preshrunk to avoid size changing. Follow the care label and your FZ FORZA clothes should be your favorite badminton clothing for years.

## MEASUREMENT GUIDE

### How to choose the right size

If your body measurements for chest and waist do not correspond with the same size, then choose the size which is closest to your chest measurement. If your are in between to sizes, then choose the smallest size for a tight fit or the bigger size for a loose fit.

### How to measure your body

To determine your clothing size you must measure your body measurement, following the instructions below.

#### 1. Centilong

Measure from top of the head and down to the floor.

#### 2. Chest

Measure around the fullest part of your chest, holding the measuring tape horizontal.

#### 3. Waist

Measure around the narrowest part of your waist, holding the measuring tape horizontal.

#### 4. Hip

Measure around the fullest part of your hip, while standing up with you feet together, holding the measuring tape horizontal.

#### 5. Inseam

Measure your inside leg length from crotch and down to the floor, while standing up straight with your feet slightly apart.

#### WOMENS:

SIZE	2XS	XS	S	M	L	XL	2XL
Chest	78	82	86	90	94	100	106
Waist	62	66	70	74	77	80	83
Hip	87	91	95	99	103	109	116
Inseam length	77	78	79	80	81	82	83

#### MENS:

SIZE	XS	S	M	L	XL	2XL	3XL
Chest	92	96	100	104	110	116	122
Waist	78	83	88	93	98	103	108
Hip	93	97	101	106	111	117	123
Inseam length	80	81	82	83	84	85	86

#### JUNIOR:

SIZE	6	8	10	12	14
Chest	116	128	140	162	164
Waist	64	68	72	76	80
Hip	66	70	74	78	82
Inseam length	55	60	65	71	77

## MIA BLICHFELDT COLLAB

I'm pleased and proud of my cooperation with FZ FORZA, which now makes it possible to present my new Collab collection.

From my own first drawings, colour inputs etc, it has been very exciting to follow and be involved all the way through the process.

I hope you all like it as much as I do.

## THE TECHNOLOGIES

### LAT

The lateral stability technology enhances the durability of the shoe and the lateral stability of the forefoot during intense and rapid transfer of direction. Lateral stability is important in a badminton shoe when moving quickly around on court from side to side.

### DURA-COAT

Our high-tech microfiber PU treated with a thin coating. The combination of Dura-coat gives the shoe an extreme durability and a unique abrasion resistance. Dura-coat is applied on areas where the shoe is most exposed for abrasion.

### X-TECH

The ankle is exposed for twisting in the many sideways motions in badminton. A twist in the ankle is one of the most common injuries in badminton, but with the evolutionary FZ FORZA X-Technology the stability of the ankle is increased which prevent/reduce the twisting of the ankle.

### DRYLEX

Consists of special mesh layer and holes in the shoe that provides excellent breathability for the feet. Drylex helps transporting moisture away from your feet to keep them dry and comfortable.

### TUCK BOARD

With our Tuck Board increases the shoe's torsional flexibility. Torsional flexibility supports the foot's natural movement and allows the foot to move faster. Our Carbon Tuck Board is made of three-dimensional carbon fiber sheets that support the torsional movement and reduce stress on the arch tendon.

### FZORB

FZorb is a fantastic material for shock absorption. By molding the FZorb into the heel-area of the sole, it decreases the force of the many hard shocks that player's feet are exposed to during the game, as well as providing increased comfort for the player.

+ Is FZorb molded into the forefoot area of the sole, to provide an greater shock absorption, particularly when during jumps and sidesteps. In addition, FZorb+ enhanced the comfort compared to FZorb.

++ For a larger shock absorption is FZorb++ the right choice. These shoes are provided with a hole under the heel, making room for an increased deformation of the material which increases the shock absorption.

### F-ZONE

Our FZone Grip ensures excellent grip on the court which supports the slip resistance. FZone Grip consists of various patterns that support a variety of movements in badminton, so the grip on the court is optimal in all game situations. We only use rubber of the highest quality for our soles to ensure an extremely wear resistant outsole.

### ASE

By inserting this light weight TPU piece under the arch creates both a lighter and stronger shoe but also more stable. ASE supports the arch and helps prevent pronation and torsion in the shoe for increased functionality and comfort.

+By extending the ASE, the FZClaw appears on the lateral side of the forefoot. FZClaw significantly enhances the lateral stability of the foot and provides the shoe extra durability during intense and rapid transfer of direction.

# RACKETS

The 2020 collection of FZ Forza rackets includes a new precision series with new titanium inserts in the shaft, the new Mia Blichfeldt racket and other interesting new products.

## – THE TECHNOLOGIES

Kevlar® is a very advanced material which combines great strength with light weight. The material is elastic and yet 5 times stronger than steel. Therefore Kevlar® has a lot of uses and is used for bulletproof vests among other things. When FZ FORZA uses Kevlar® in combination with graphite in the rackets we can make light and extremely strong rackets with a lot of power. Kevlar® helps absorb the shock at impact, making the racket feel soft and comfortable which lets you generate more power.

Titanium is a very light and rigid material which is used to build space shuttles among other things. The combination of graphite and titanium increases the racket's durability and gives the racket increased control.

As we continue to improve our rackets and strive towards creating the best racket in the world, we continually research and develop new materials and ideas to take our rackets to the next level. Carbon Nano Tubes (CNT) is based on extraordinary small scale advancements in the material construction. Thanks to our cooperation with Aalborg University in Denmark, FZ FORZA is able to introduce world-class rackets manufactured using polymer composite materials modified by Multi-Wall Carbon Nano Tubes (MWCNT). Thanks to the MWCNT technology your FZ FORZA racket has improved durability in comparison with conventional rackets. The polymer resin that binds the carbon fibers together will ensure toughness and damage tolerance.

This material is used to enhance the performance in our very best rackets. The ultra high modulus graphite is stronger and stiffer than ordinary graphite, creating rackets that have less torsion and more power. This will give you more accurate and powerful strokes.

The slim shaft greatly reduces the air resistance when swinging and it greatly increases your swing speed but with less effort. The FZ FORZA slim shaft rebounds almost as fast as a conventional shaft, meaning that you get much more stability and accuracy, making it a superior choice when you are looking for a slim shaft racket.

Power Series .....	34-39
Precision Series.....	41-45
Light Series.....	47-49
Dynamic Series .....	50
Power Trainers.....	52

The slim frame is 12-18% thinner than conventional rackets. We achieve this by combining superior high grade materials and resins with our proprietary production methods to achieve a slimmer racket frame that moves faster through the air, without sacrificing power or torsion.

Our air flow frame reduces drag and air resistance during your stroke, enabling you to deliver more power and precision. Furthermore the more rigid T-joint construction offers a much more stable frame with almost no torsion, allowing you to put the shuttle exactly where you want it.

The slightly oversized frame helps increase the sweet spot for easier shot-making and increased fun while playing. The racket is still light and the special shape of the oversize head means that you will still be able to generate lots of power. The future of oversize rackets has started here.

Combining the benefits of the hexa and octagon shape, this innovative shape gives you both increased strength in the racket, while being thinner on top. Decreased air-resistance combined with less torque makes this a precise, fast and durable weapon on court.

FZ FORZA has developed a hexagon frame which is more narrow and stronger than usual. It gives reduced air resistance and less torsion. That means faster reactions, better control and more power.

FZ FORZA has developed an octagon frame which ensures that the air flows around the frame with greater ease, thus increasing your reaction time. The frame is also more narrow and stronger than usual reducing air resistance and providing torsion. The frame design is extra durable, making you play stronger for longer.

<b>Durability</b>	5
<b>Lenght</b>	200 m
<b>Gauge</b>	0,70 mm

Used in all FZ FORZA full graphite rackets. A top quality multifilament string, which offers superior playability. A thin string which gives low air resistance but still with a good durability and superior tension holding. A tournament string offering extremely good playability and power. Recommended for all players.
